

AppCreator is a holistic on-premises low code application development platform. Harnessing it, you can automate your enterprise processes with ease to save time, money, and effort.

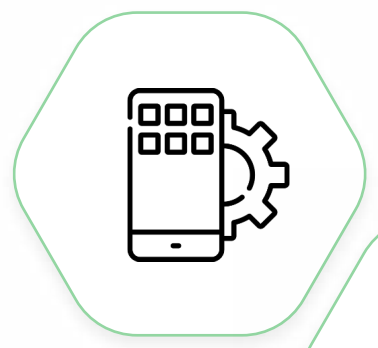

Empower your enterprise with the power of low code

Line-of-business users
or developers—AppCreator empowers both.

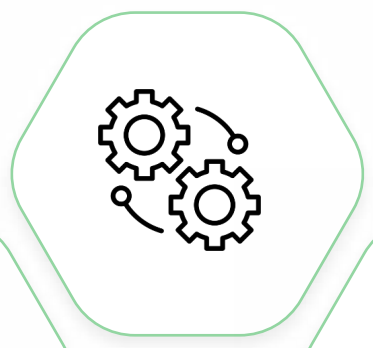

Line-of-business users

Develop powerful apps without coding

Drag, drop, build, and deploy to the web, iOS, and Android

Integrate with ManageEngine ServiceDesk Plus seamlessly

Use the Blueprint feature for IT process automation

Leverage easy business intelligence and analytics

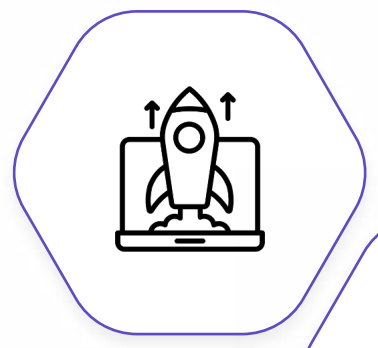

Automate complex and multi-step tasks quickly and easily

Enjoy reduced dependence on IT teams to automate business processes

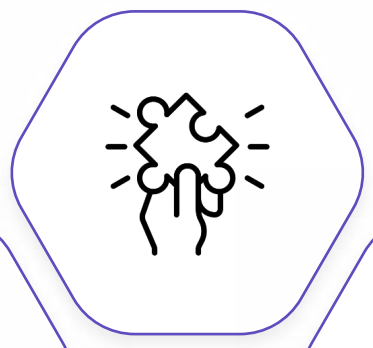

Developers

Prototype and deploy much faster—ship solutions 10x faster than conventional methods

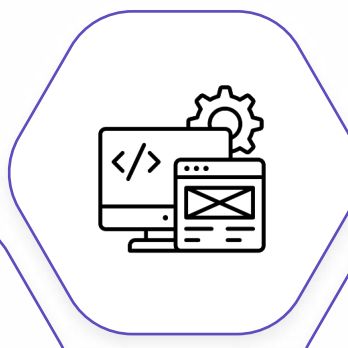

Script custom logic easily using Deluge

Host your solutions and applications on your own servers

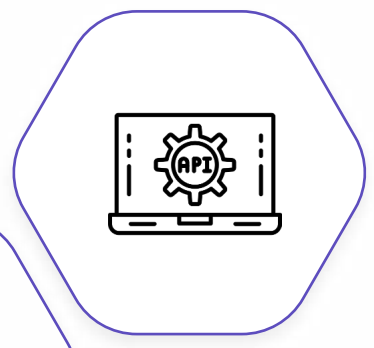

Build custom online portals for secure data access

Create progressive web apps automatically

SAML authentication for tight security

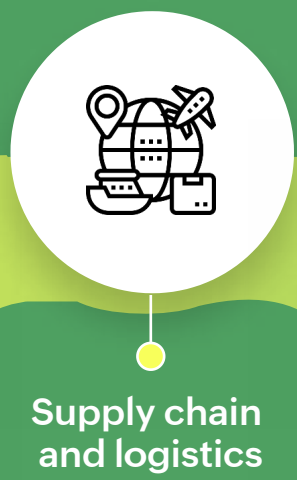

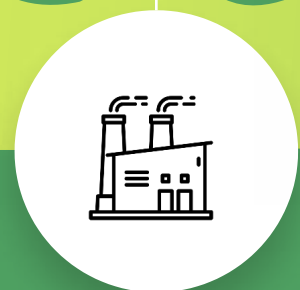

Utilize REST APIs to perform CRUD operations

Industries

Manufacturing

Procurement

Healthcare

Empower your employees

CXOs for digital transformation

Technical staff for independent app ideation and rapid prototyping

Empower line-of-business users to rely less on overworked IT teams, and eliminate shadow IT
