

Are privileged users putting your data at risk?

In today's evolving threatscape, unchecked access rights can be the gradual undoing of enterprises. The only way out is complete privileged access governance, combining powerful controls for privilege delegation with constant monitoring of privileged users.

Regulate Access

Monitor Activities

Audit Operations

Analyse Actions

Detect Anomalies

Extensive capabilities for holistic control and protection

Enterprise credential vault

Secure remote access

Just-in-time privilege elevation

Privileged session monitoring

Privileged user behavior analytics

Context-aware event correlation

Auditing and compliance

Comprehensive reporting

SSH key management

SSL certificate management

Application credential security

DevOps protection

Ticketing system integration

SIEM Integration
