# rock solid reasons

to choose SharePoint Manager Plus

> ManageEngine) SharePoint Manager Plus

#### A single console for SharePoint On-Premises and Office 365

SharePoint Manager Plus helps administrators manage both SharePoint servers and online SharePoint environments from a single console.

#### Easy management of permissions and groups

Prevent security breaches and unauthorized access to sensitive content by managing the intricacies of SharePoint permissions, groups, and users across the SharePoint environment.

## Change auditing for individual infrastructure elements

Audit any change made to site collections, sites, lists, documents, and files and receive exhaustive information on them with SharePoint Manager Plus' intuitive reports.

#### **Track content reception**

Keep an eye on usage trends to learn which content is and isn't favored. Leaverage this insight to generate content that has better chances of being received by users.

### Migrate to Office 365 in a jiffy

Content from SharePoint On-Premises can be granularly selected and moved to Office 365 at any time, thereby eliminating the risk of business disruption and downtime.

### Reports with unparalleled granularity

SharePoint Manager Plus' built-in reports let nothing go unnoticed and make compliance easy by simplifying auditing and reporting tasks. These reports can be scheduled to run automatically and sent in various formats via email.

#### **Delegation of administration**

Administrators can delegate control to other users to relieve themselves of the burden of managing their entire SharePoint environment.

#### **Tech Specs**
